JavaScript/ES6  
PHP  
SQL

## Frameworks/Libraries

Vue JS  
Bootstrap/Materialize  
HUGO

## Tooling

Git  
NPM  
VSCode  
Google Chrome Dev Tools  
Netlify  
Postman

## Other

REST  
JSON  
OOP  
Google Firebase  
Adobe XD  
Leadership  
Project Management

# Profile

I am an Armed Forces veteran with a background in Fin-tech and travel risk management operations; However, my passion is the web and the technology that powers its progression. I am currently working with Vue JS and Google’s Firebase platform, whilst furthering my knowledge of the Vuex state management library and SSR using Nuxt. Outside of my work, I am passionate about angling, photography and music.

# Experience

## OSINT : SRC | 2019-2020

OSINT : SRC is an open source, operational intelligence sharing platform built around user generated content and implemented using Vue JS and Google’s Firebase.

## UpliftEnergyTherapies.com | 2018-2019

Uplift energy therapies are a health and wellness business specialising in Reiki and Yogic therapy techniques. This online business card was implemented using Hugo to generate a static site that has the scope to scale with content managed and generated by the client.

## SI Risk Ltd | 2019-2020

At SI Risk I worked heavily with many browser based tech platforms including a proprietary React SPA and the Asana project management platform. Also within this role, I created documentation and training materials for several online tools.

## Thomson Reuters | 2014-2019

As an operations team manager, I was responsible for resource planning, operational strategy, work allocation, coaching and people management. This role enabled me to develop strong time management and interpersonal skills and in Q1 2017, I designed and lead on a project which increased operational productivity by over 22% and lead to over £250,000 profit increase over the course of the year.
